Bayou City Sports Medicine

6560 Fannin Street, Suite 1850, Houston, TX 77030 Phone (713) 555-0246

Visit Summary

Patient	Daniel Christopher Brooks	Date of birth	November 14, 1979
Date of visit	February 12, 2026	Provider	Patricia Voss, MD
Reason	Six month hip and back monitoring	Insurance	BCBS TX XJB908445127

History

Mr. Brooks is a 46 year old former professional dancer, currently artistic director of a ballet company. He continues a structured Pilates program four mornings a week and reports no new symptoms since the last visit. Long standing right hip flexor tightness remains stable. The mild L4 to L5 disc finding is unchanged and asymptomatic at rest.

Examination

Gait normal. Hip range of motion full on the left, mildly limited on the right at end range flexion without pain. Lumbar flexion and extension within functional limits. No neurological deficit in the lower extremities. Strength 5 of 5 throughout.

Assessment

Chronic right hip flexor tightness, stable. Mild L4 to L5 degenerative disc change, asymptomatic. Excellent overall conditioning and bone density confirmed on prior imaging.

Plan

Continue daily hip flexor and hamstring mobility work.

Maintain core stabilization through the current Pilates schedule.

Continue calcium with vitamin D and magnesium as currently taken.

Return in six months for routine monitoring, scheduled October 20, 2026.
